

Sports Medicine	Year 1	Year 2	Year 3
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Perform and interpret the findings of a thorough problem-focused history and physical exam, including: <b>problem-focused history.</b>			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Perform and interpret the findings of a thorough problem-focused history and physical exam, including: <b>neurologic examination.</b>			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Perform and interpret the findings of a thorough problem-focused history and physical exam, including: <b>vascular examination.</b>			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Perform and interpret the findings of a thorough problem-focused history and physical exam, including: <b>dermatologic examination.</b>			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Perform and interpret the findings of a thorough problem-focused history and physical exam, including: <b>musculoskeletal examination.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: <b>plain radiography.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: <b>radiographic contrast studies</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: <b>stress radiography.</b>			

Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: <b>fluoroscopy.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: <b>nuclear medicine imaging.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: <b>MRI.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: <b>CT.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: <b>diagnostic ultrasound.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: <b>hematology.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: <b>serology/immunology.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: <b>blood chemistries.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: <b>synovial fluid analysis.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: other diagnostic studies, including: <b>electrodiagnostic studies.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: other diagnostic studies, including: <b>computerized gait/force plate studies.</b>			
Perform (and/or order) and interpret appropriate diagnostic studies, including: other diagnostic studies, including: <b>compartment pressure studies.</b>			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. <b>Formulate an appropriate diagnosis and/or differential diagnosis.</b>			
appropriate non-surgical management when indicated, including: manipulation/mobilization of: <b>foot/ankle joint to increase range of motion/reduce associated pain.</b>			
Appropriate non-surgical management when indicated,			

including: manipulation/mobilization of: <b>congenital foot deformity.</b>			
Appropriate non-surgical management when indicated, including: closed management of fractures and dislocations: <b>closed management of pedal fractures and dislocations.</b>			
Appropriate non-surgical management when indicated, including: closed management of fractures and dislocations: <b>closed management of ankle fracture/ dislocation.</b>			
Formulate and implement an appropriate plan of management, including: appropriate non-surgical management when indicated, including: <b>cast management.</b>			
Formulate and implement an appropriate plan of management, including: appropriate non-surgical management when indicated, including: <b>tape immobilization, including:</b>			
Formulate and implement an appropriate plan of management, including: appropriate non-surgical management when indicated, including: <b>orthotic, brace, prosthetic, and custom shoe management.</b>			
Formulate and implement an appropriate plan of management, including: appropriate non-surgical management when indicated, including: <b>footwear and padding.</b>			
Formulate and implement an appropriate plan of management, including: appropriate non-surgical management when indicated, including: <b>injections and aspirations.</b>			
Formulate and implement an appropriate plan of management, including: appropriate non-surgical management when indicated, including: <b>physical therapy.</b>			
Appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: <b>NSAIDs.</b>			
Appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: <b>narcotic analgesics.</b>			
Appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: <b>corticosteroids.</b>			
Appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: <b>antirheumatic medications.</b>			

Appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: <b>topicals.</b>			
Formulate and implement an appropriate plan of management, including: appropriate anesthesia management when indicated, including: <b>local anesthesia.</b>			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. <b>Assess the treatment plan and revise it as necessary.</b>			
Practice with professionalism, compassion, and concern, in a legal, ethical, and moral fashion. <b>Abides by state and federal laws governing the practice of podiatric medicine and surgery.</b>			
Practice with professionalism, compassion, and concern, in a legal, ethical, and moral fashion. <b>Practices and abides by the principles of informed consent.</b>			
Practice with professionalism, compassion, and concern, in a legal, ethical, and moral fashion. <b>Understand and respects the ethical boundaries of interactions with patients, colleagues and employees.</b>			
Practice with professionalism, compassion, and concern, in a legal, ethical, and moral fashion. <b>Demonstrates professional humanistic qualities.</b>			
Practice with professionalism, compassion, and concern, in a legal, ethical, and moral fashion. <b>Demonstrates ability to formulate a methodical and comprehensive treatment plan with appreciation of health care costs.</b>			
Demonstrate the ability to communicate effectively and function in a multi-disciplinary setting. <b>Communicate in oral and written form with patients, colleagues, payers and the public.</b>			
Demonstrate the ability to communicate effectively and function in a multidisciplinary setting. <b>Is able to partner with health care managers and health care providers to assess, coordinate and improve health care.</b>			
Demonstrate the ability to communicate effectively and function in a multidisciplinary setting. <b>Maintains appropriate medical records.</b>			
Has the capacity to manage individuals and			

<p>populations in a variety of socioeconomic and health care settings. <b>Advocates for quality patient care and assists patients in dealing with system complexities.</b></p>			
<p>Has the capacity to manage a podiatric practice in a multitude of health care delivery settings. <b>Understands medical-legal considerations involving health care delivery.</b></p>			
<p>Be professionally inquisitive, lifelong learners and teachers utilizing research, scholarly activity and information technologies to enhance professional knowledge and clinical practice. <b>Reads, interprets, critically examines, and presents medical and scientific literature.</b></p>
